ASP Modelling 2

Víctor Gutiérrez-Basulto

List of Tasks

Please complete past exercises

If you did not finish past labs, please work on that first.

1 N-Queens Problem

Following the steps discussed during the lecture, write and execute the three variations of the program for addressing the N-Queens problem.
Run `clingo -n 0 <program.pl>` to display all the stable models of your program; the options `--mode=gringo --text` to see the result of the grounding; and `--stats` to enable statistics.

2 Exercises

Write and execute the exercises presented during Modelling 1 and 2 lectures.
